Summary

Senior full-stack engineer and emerging technical lead operating a regulated, multi-region trading platform that processes over **1.4B production events monthly**. Ship event-driven microservices on AWS serverless in TypeScript/Node.js and Java, fronted by a React Native app and BFF API layer, integrated with brokers over FIX and Kafka/Avro. Own architecture decisions and secure CI/CD standards, and built a custom **AI-augmented SDLC harness** around Claude to accelerate design, code review and incident RCA.

Experience

IG Markets (IG Group)

Apr. 2026 – Present

Senior Software Engineer, Full-Stack

Bangalore, India

- Design and operate event-driven microservices across a **50+ service platform** spanning **three regulated markets** (SG, AU, UAE) on **AWS serverless** (Lambda, EventBridge, SQS, DynamoDB, Step Functions, SAM), processing **~33M pricing events/day at sub-millisecond p99**.
- Ship **full-stack** features across a **React Native** app, a **TypeScript/Node.js** BFF API layer and **Java/Spring Boot** services, integrated with brokers over **FIX** and IG Core over **Kafka/Avro**.
- Built **secure money movement** across transfer, ledger and event-distribution services — inter-account transfers, bank payouts with regulatory limits, RTGS routing, Apple Pay — handling **~3.4M ledger events/day at p99 under 25ms**.
- Leading redesign of a rate-limited event path that silently dropped production messages, applying **idempotency, dead-letter queues and region-gated rollout** to eliminate data loss.
- Own **cross-service root-cause analysis** (OpenTelemetry, Honeycomb), tracing a systemic region-routing defect behind multiple recurring incidents; remediated **BOLA/IDOR** findings and enforced CI security gates.
- Mentor engineers and review code within a **10-engineer squad**, coordinating delivery across squads and compliance stakeholders.

Genpact

Nov. 2023 – Mar. 2026

Lead Consultant — Software Engineering

Bangalore, India

- Led a 10-engineer team** building Smartshop MES, a multi-tenant **B2B SaaS** platform for GE Gas Power, replacing legacy systems across **5 factories** and saving **\$2MM**.
- Architected the integration layer connecting an **Angular / Java Spring Boot** app to SAP, Kronos and **DynamoDB** via an iPaaS event bus, removing manual cross-system reconciliation.
- Cut recurring production defects **50%** and raised first-time-right delivery **20%+** through enforced test coverage, structured issue triage and precise technical specifications.

Infosys

Sep. 2019 – Nov. 2023

Specialist Programmer

Bangalore, India

- Built full-stack features for **Citibank's** Portfolio Analysis Tool — responsive **Angular** interfaces on **Java REST** services — load-tested with **JMeter** and validated against quantitative models in **MATLAB**.

HP (Hewlett-Packard)

Jun. 2019

Intern — Distributed Systems

Bangalore, India

Key Projects

Multi-Region Event Distribution | *EventBridge, Lambda, SQS, TypeScript*

IG Markets, 2026

- Rebuilt a message-dropping vendor integration with idempotency keys, DLQ replay and per-region cutover.

Funds Transfer & Payouts | *Java, Spring Boot, Kafka, React Native*

IG Markets, 2026

- Delivered transfer and payout journeys end to end, enforcing per-market withdrawal limits and RTGS rules.

Public Opinion Mining | *HMM, NLP, Fuzzy Logic*

SRM University, 2019

- Voice-based citizen grievance platform routing complaints to the correct government department via sentiment analysis.

Technical Skills

Languages: Java, TypeScript, JavaScript (Node.js), SQL

Architecture: Distributed Systems, Large-Scale System Design, Event-Driven Microservices, DDD, Idempotency

Cloud: AWS — Lambda, EventBridge, SQS, DynamoDB, Step Functions, Fargate, Cognito, SAM/CloudFormation

Backend & Frontend: Spring Boot, Node.js, REST, gRPC, React, React Native, Angular

Data & Observability: PostgreSQL, DynamoDB, Kafka, Avro, FIX Protocol, OpenTelemetry, Honeycomb, CloudWatch, Incident RCA

CI/CD, Testing & Security: GitLab CI, Git, JUnit, Jest, JMeter, TDD, Snyk, Wiz, Secure SDLC

AI Engineering: Claude, Agentic Coding Tools, MCP, Prompt Engineering, AI-Augmented SDLC Tooling

Certifications: AWS Certified Solutions Architect — Associate (2025), AWS Certified AI Practitioner (2025)

Education

SRM University, Chennai, India — B.Tech, Computer Science and Engineering

Mar. 2015 – Nov. 2019
